baad me

`int b = 5;`

`b++;` →

`S.O. Pln (b);` →

a → 6

++ → ++

-- → -1

int a = 5;

int c = ++a;

Prefix Increment

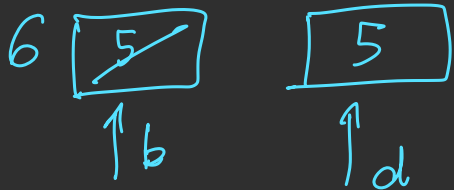

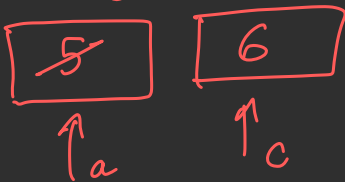

↳ Increase → 1st
↳ Use → 2nd

int b = 5;

int d = b++;

Postfix Increment

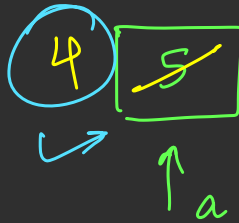

↳ Use → 1st
↳ Increase → 2nd

int e = 5; e = e + 1 → 6

int a = 5;

int b = -- a;

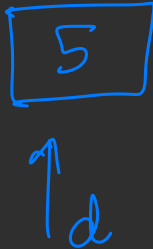

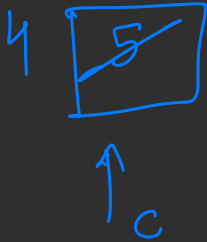

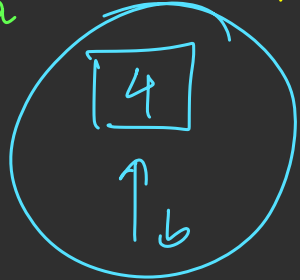

Prefix

↳ dec
↳ use

int c = 5;

int d = c --;

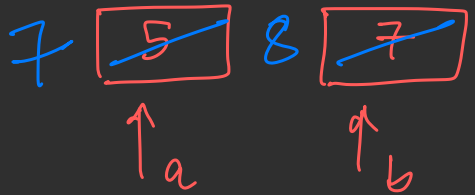

Postfix

↳ use
↳ dec

int a = 5;

int b = 7;

int c = a++ + ++b + a + ++a;

S.O.Plu(c);

5 8 6 7

Size → Provide Introduction to Arrays

Variable → to store something

100 marks → 100 variable?

Large Data → Array ✓

Same type

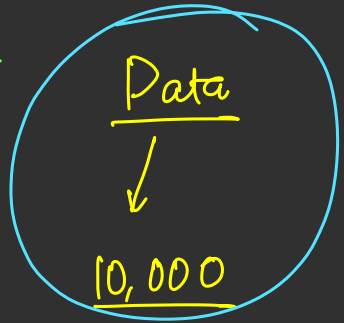

└─→ Data structure

└─→ data type

int array

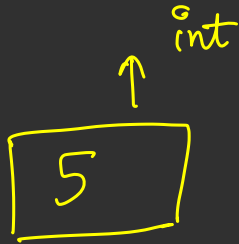

String array

marks

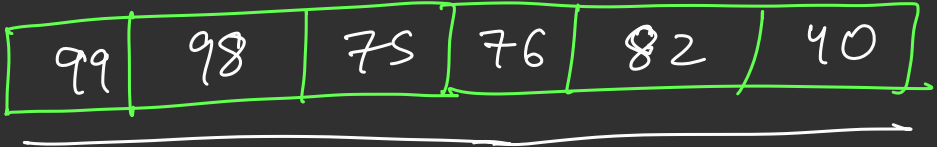

Intuition for Arrays

Large amount of same type of data

`int a = 5;`

6 size → marks

Creating arrays with different datatypes

Rule

datatype array Name [] = new datatype [size];

int arr symbol → array int number of element

memory create

int an [] = new int [5];

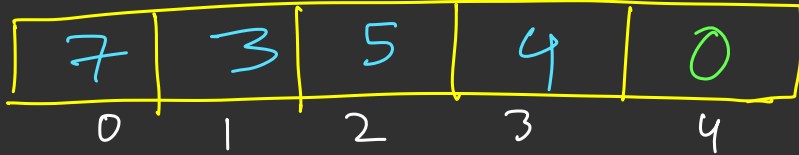

by default → 0

size = 5

Indexing in Arrays

array [index] = val

```
int marks[] = new int[5];
```

```
marks[2] = 5;
```

```
marks[0] = 7;
```

```
marks[1] = 3;
```

```
marks[3] = 4;
```

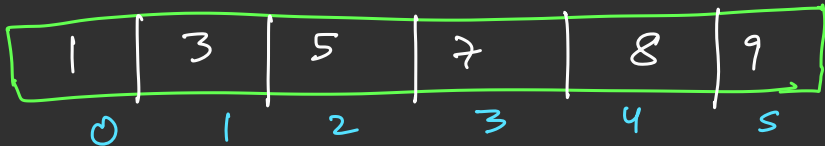

3rd

index = 2

A → B → for

Printing Arrays

loop → Print element

```
for (int i = 0; i < 6; i = i + 1)
```

{

 s.o.pln (arr[i]);

}

i = 0

↓

arr[0]

Memory Allocation in Arrays

Basic Functions in array

Pass by value and Pass by reference in Array

Question : Check if a element is present in array or not

Question : Find maximum and minimum in a array

Question : Check if array is sorted or not
